Bunmuyuw, near Kaulay in northcentral Muyuw, one of a dozen or more “megalithic structures” near there and with many others spread across the northern side of the Kula Ring. These date from perhaps as early as 700ce, going out of formal use circa 1400ce.

“... to raise ethnographic fieldwork to a professional art.” P. 15

Malinowski's Trobriand ethnography is the most famous case study in social anthropology. Mosko has done long-term fieldwork in the islands and, on the centenary of Malinowski's study, he has come up with a radical reinterpretation of key features of Trobriand life: magic, fatherhood, and the ancestors. Drawing on contemporary theoretical perspectives, Mosko has written the Trobriand ethnography for the twenty-first century.
